Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. A substitute specification including the claims is required pursuant to 37 CFR 1.125(a) because the previously received substitute specification is not marked relative to the original specification translation but rather on a second specification that was based on the translation but not marked relative to the translation. Further, there are several sheets submitted (pages 7-21 most marked Confidential Samsung Electronics) that no instructions to delete or where to be inserted into the specification are found. Applicant is required to provide instruction as to the disposition of these sheets.

A substitute specification filed under 37 CFR 1.125(a) must only contain subject matter from the original specification and any previously entered amendment under 37 CFR 1.121. If the substitute specification contains additional subject matter not of record, the substitute specification must be filed under 37 CFR 1.125(b) and must be accompanied by: 1) a statement that the substitute specification contains no new matter; and 2) a marked-up copy showing the amendments to be made via the substitute specification relative to the specification at the time the substitute specification is filed.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The main elements of the invention and their relationships to one another are not adequately described so as to understand the claimed invention. More specifically what is the relationship between the manufacturer key and authentication qualification key?

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 recites the limitation "the second registration request" and "the third registration request" in claim 1. There is insufficient antecedent basis for this limitation in the claim.

Claim 5 recites the limitation "the first registration request", "the second registration request", and "the third registration request" in claim 5. There is insufficient antecedent basis for this limitation in the claim.

Claim 13 recites the limitation "the third channel key" in claim 13. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2132

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

7. Claims 1-17 are rejected under 35 U.S.C. 102(e), to the extent understood, as being anticipated by Dolphin, U.S. Patent No. 5,677,953. Referring to claims 1-17, Dolphin discloses a system for the control access control of portable data wherein data is encrypted and distributed under a particular scheme. The publisher builds a key and signature tables, with regards to the data and the users, from a key database (Col. 10, lines 30-50) where the keys are generated randomly (Col. 9, lines 20-25). A PCMCIA (portable terminal) stores the encryption and decryption key information of the publisher (Col. 3, lines 10-27). The data is published on a server (content supply means)(Col. 2, lines 33-44). A publisher (authorization recognition means) has the encryption tool (manufacturer key, authentication qualification key) to encrypt the data (Col. 2, lines 59-67). From their personal computer, a user can access the server (content supply means) and requests access to certain data. The server transmits a key to the user based on the result of a billing authorization (Col. 3, lines 27-45).

Conclusion
